

Scaleable Computing

Practical Scores -> Marks

CS7NS1/CS4400

Stephen Farrell

`stephen.farrell@cs.tcd.ie`

<https://github.com/sftcd/cs7ns1/>

Note: PRs for repo are welcome!

Overall Marking Scheme

- 20% Blackboard and in-class exam
 - 10% assignment 3;
 - 10% in-class exam
- 60% Practical assignments
 - Next slide
- 20% Module final report
- Blackboard and in-class exam marking in-progress

Submittity Practicals

- Assignment2 (benchmark john): 10%
 - You score zero or 10% depending if you did it or not
- Practical3 (1000 hashes): 10%
 - $\text{Mark} = 10 * \text{ceil}(\text{score}/1000)$
- Practical4 (2000 hashes): 15%
 - $\text{Mark} = 15 * \text{ceil}(\text{score}/1765)$ – 1765 was best score
- Practical5 (infernoball): 25%
 - Provisional Mark = $25 * \text{ceil}(\text{score}/9999)$
 - Provisional - depends on module final report content

Provisional Submittity Marks

As of 2018112-120000Z

A last Easter Egg

- InfernoBall scoring was setup to allow you to submit duplicate lines and to score for each as if it were a new level
- Two teams co-discovered that last week and get an additional bonus as a result (not applied in the previous slide)
 - They properly disclosed finding the “bug”
 - Nobody else had submitted files with dupes before then:-)
- I switched in the code to de-dupe the inputs last Thursday
 - Hence the short “outage” when submissions all scored zero, because I mucked up doing that from afar:-)

Module Final Report

- Not a dissertation – keep it short
 - ~8 pages, use URLs to refer to code (in github or similar) or additional text if needed
- Template is in markdown at:
 - <https://github.com/sftcd/cs7ns1/mfr.md>
- Submit as PDF to BB/TurnItIn submission task
 - Ciaran will create the BB task
- You must also complete the CS7NS1/CS4400 Scalable Computing Survery on Blackboard – already open

Module Final Individual Report Template - 1

CS7NS1/CS4400 Module Final Report

Student name:

Student number:

Date:

Module Final Report Template - 2

InfernoBall team self-evaluation (each team member to complete independently)

Team number:

Team members: - list names here

- Insert team member initials in column headers.
- Effort must be high/medium/low/zero
- Effectiveness must be high/medium/low/zero

Use zero if someone really didn't participate at all. Include your evaluation of yourself as well as other team members.

Be honest.

	Name 1	Name 2	Name 3	Name 4
effort				
effectiveness				

Module Final Report Template - 3

What I learned (1-2 pages)

Describe what you learned from taking the module.

Module Final Report Template - 4

What I did (2-4 pages)

Describe what you did during the module, i.e., how you solved the practicals. Include URLs for code/repos but not the code itself. If you have more text than fits in 4 pages, include a link to that additional text but do make the 4 pages self-contained (other than code).

Module Final Report Template - 5

Module evaluation (1 page)

Say what you liked/disliked about the module and why.

There's no need to say that RosettaHub is creaky, we know that:-)

Deadlines

- InfernoBall deadline: Nov 19th
- Survey Dec 7th
- Module final report due: Dec 7th
